What you should know about the EB footbath

www.ebfootbath.com

We now offer the latest technological advancements in enhancing the body's ability to heal! The addition of the EB-PRO™ is another step in facilitating the road to a healthy life.

We assume the food we eat, the water we drink, and even the air we breath come from a pure source, however, we live in a toxic world. Over time the build up of environmental toxins, either physical and/or chemical, overload our systems, which the body uses to produce energy and detoxify.

As a result, the body's cellular matrix can't work at an optimal state, creating a cascade effect for physical ailments and potential health problems. These include **allergies, arthritis, immune deficiencies, migraines, fatigue, decreased muscle function, loss of flexibility, cancer, heart disease, circulatory problems and memory impairment**, just to name a few. The *EB-PRO™ ION Therapy System* will begin the process of enabling the body to restore its natural state of balance and health. So join the wave of the future and sign up for your "EB" appointment today.

Enjoy living a healthy life!

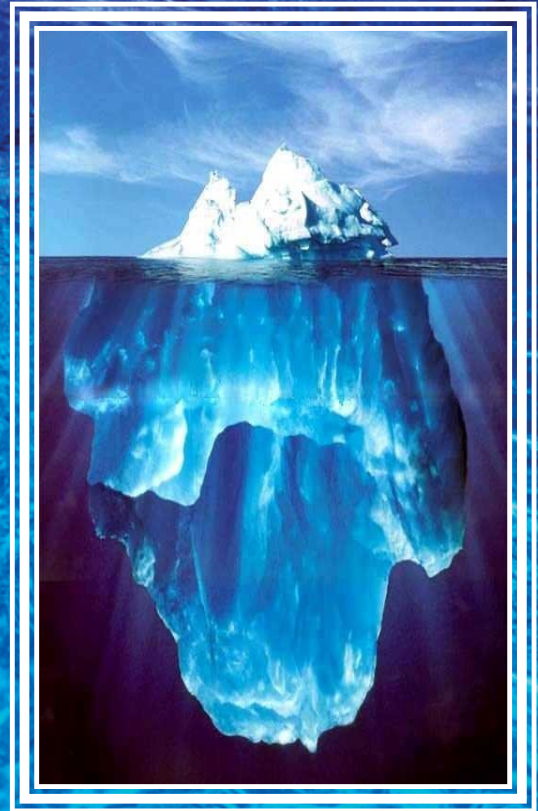

EB WATER BEFORE

EB WATER AFTER

This technology is manufactured to ISO standards at Erchonia in McKinney Texas and is Patent Pending

We are living in a very toxic age. The present toxic problem is the tip of the iceberg. We only see the visible part on the surface. Even if we stopped poisoning our environment now, the accumulation of toxic substances would only come to a standstill in 5 years at the earliest. Because there are still so many substances on the assembly line, we would still have to live in a poisoned world for the next 80 to 90 years.
